

Lincoln Greens Golf Course | Pro Shop

Project Description

Construction of a 6,500 square foot building (with basement) for the new pro shop and banquet facility at Lincoln Greens Golf Course in Springfield, Illinois.

Project includes:

- wrap-around porches
- walkout basement, used for golf cart storage
- exterior retaining walls and patio

Owner – Springfield Park District
 Architects – Wesley Corgan
 Completion Date – December 2004
 Contract Value – \$825,000

Project Details

- Erection of over 200 pieces of hollow-core pre-cast floor planks on structural steel, with composite concrete topping for main floor structure.
- Placement of over 150 cubic yards of reinforced concrete for basement cart storage.
- Custom pro-shop counter and cabinetry.
- Construction of banquet facility and catering spaces adjacent to new golf pro-shop.

Unique Challenges

- Coordination of material delivery to jobsite through high traffic golf course.
- Temporary heating required to complete interior finishes work.
- Construction of new facility adjacent to existing pro-shop operations.
- Coordination of new utilities for building through basement and frost walls.
